JUSTMAN DENSE BLACK

Ink Number	Description	Tack
A130396	OS Justman Dense Black	15.5

Tack readings are @ 1200 RPM, 1 minute 90° Fahrenheit, on a Thwing Albert 101 Inkometer.

Application Justman Dense Black is a stand-alone dense black suited for use on single color and multi-color presses. It also works well on presses equipped with aqueous coating units.

Features & Benefits

Density & Gloss Justman has superb density and gloss. It will set new standards as the product of choice when other dense blacks fall short of expectations.

Set Speed Justman Dense Black has medium to good set speeds.

Scuff Resistance Dries to a hard dry film with good scuff resistance.

Post Processing This is a finishing friendly black ink, but Gans recommends pre-testing for any critical post-press procedure, especially with laser printing.

Stocks Works well both on coated and uncoated stocks.
