

TECHNICAL #155

BULLETIN

Tuxedo Black

Tuxedo Black has been formulated to offer a dense, jet black for general purpose use. By combining some of the characteristics of a quick-setting system with the advantages of a 100% oxidation ink system, this workhorse black shows excellent resistance to marking and scuffing through the bindery phase. In addition, where picking is a problem, such as a second pass through the press, Tuxedo Black has shown exceptional resistance. Other qualities exhibited are good gloss, set speed and press stability.

This product is not intended nor suitable for use on non-absorbent substrates such as plastic, foil and vinyl. For these applications we recommend a hard dry black such as 86832 or Plasti-Pro black (A102550).

<u>Ink #</u>	<u>Description</u>	<u>Tack</u>
87590	Tuxedo Black	17.0

All tack readings are at 1200 rpm, 1 min., 90°F – T.A. 101 Inkometer.

NOTE: 87590 Tuxedo Black is not considered to be imprintable, nor is it finishing friendly.
