

GANS' Newest Litho Blanket **ULTRA-DOT!**

Ultra-Sharp Image!

Ultra-Long Lasting!

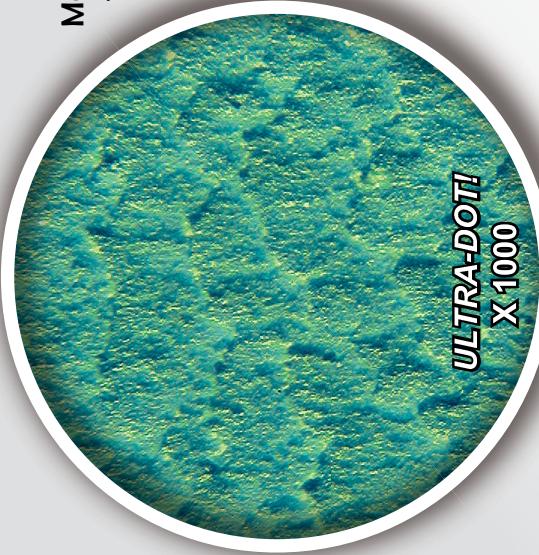

Ultra-Low Cost!

Contact your local Gans Ink & Supply representative today to set up a No-Risk trial of our newest ULTRA-DOT! sheet-fed and web offset blanket material.

ULTRA-DOT!

THE Premium Offset Printing Blanket Surface That Offers Both **QUALITY and ECONOMY!**

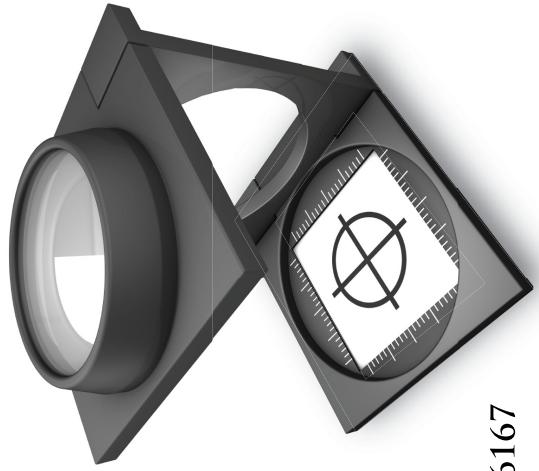

Manufactured exclusively for Gans Ink! A unique surface compound, combined with a state-of-the-art *ULTRA*-buffing process that forms a micro-absorbent finish up to 7 microns deep! These “peaks and valleys” capture and hold much higher levels of ink than typically buffed blanket materials, keeping the image on the blanket more saturated for significantly higher ink transfer capacity. Because of this revolutionary printing surface, higher densities can be achieved on press without increasing the ink flow. Dots will print sharper due to a better release to the sheet and piling/picking issues (common with FM “Stochastic” screening) will be reduced or eliminated!

SPECIFICATIONS

Color	Hardness	Gauge	Surface
Dark Blue (PMS 300U)	80° Shore A	3-Ply .067" +/- .0025" 4-Ply .077" +/- .0025"	ULTRA-Buffed

FEATURES

- ULTRA-Buffed Surface** More color saturation for better transfer, release & sharper image.
Brighter colors and higher densities with less ink! Less piling/picking.
- Solvent Resistant Surface AND Backing** More resistant to aggressive low VOC solvents and vegetable oil based inks. Less surface swell and carcass breakdown. Longer life!
- Unique Surface Rubber Compound** An extremely durable surface layer that resists cut-lines from heavy basis weight paper stocks. Formulated for a hard finish that holds up to smashes and day-to-day abuse for maximum value!
- LOW COST!** Gans Ink knows value! **ULTRA-DOT!** costs less and lasts longer!
