BULLETIN

DRIERS

Unit II Cobalt Drier (S-1041)

Unit II Cobalt Drier is a top drier. It works to improve drying on difficult or previously printed stocks. In liquid form.

Usage: Add 1/4 - 3/4 oz. per pound of ink.

Tu-Way Drier (S-1072)

Tu-Way Drier is a top and bottom drier. It features the best qualities of paste and cobalt in one complete drier. With Tu-Way Drier ink films dry slower, as compared to the Unit II Cobalt Drier, but it will provide complete drying from top to bottom. In paste form.

Usage: Add 1/2 to 1 oz. per pound of ink.

Graftec Water Activated Drier (D-2006)

Graftec is a water activated drier which is intended primarily for use when printing on non-absorbent substrates such as vinyl, acetate, foil, etc. The material reacts with the water emulsified in the ink to evolve oxygen into the stack. The oxygen is then available to aid in the drying process. In paste form.

Usage: Add 1/4 - 1/2 oz. maximum, per pound of ink.
