## Dense Plus Black Metal Decorating Inks

Gans Metal Decorating Dense Plus Black has been formulated for maximum jettness and density for use specifically when overprinting white flat metal sheets.

Dense Plus Black offers excellent dot reproduction, gloss, and jettness, and dries ro a hard post-cure film. Offering very good press stability and good stay open properties, Dense Plus Black is fully imprintable and bleed-resistant with most post-lacquer coatings.

Ink	Description	Tack
AI02108	OS Hard Dry MD Dense Plus Black	25
