

## Snow White

Metal Decorating Inks

Gans “Snow White” Metal Decorating inks have been developed to offer optimum coverage when printing on flat sheet blank metals.

SnowWhite offers excellent coverage over metal. It offers a bright white appearance with exceptionally low yellowing, even when oven temperatures are high end. Snow White dries to a smooth clean finish with excellent adhesion.

Very press stable and will non-skinning in the fountain, Snow White is fully imprintable and lacquer coatable, and is suitable for intermixing with tint colors. Note: Snow White is available in plastic containers only

Ink	Description	Tack	Viscosity
27994*	OS MD Snow White	21	450-480 Poises

Tack reading at 1200 rpm, 1 minute, 90°F - T.A. 101 Inkometer.

Viscosity: La Ray Falling Rod
