## Plasti-Pro 4/C Process Inks

Plasti-Pro 4/C process inks are a “niche” ink set specifically formulated for non-porous substrates. This unique formulation offers a measure of set speed coupled with adhesion properties not as apparent in conventional hard dry ink systems.

Suitable for large presses, as well as newer small format presses, Plasti-Pro is “finishing friendly,” and, under ideal conditions, can be in-line aqueous coated. (Pre-testing is advisable.)

Plasti-Pro is not recommended for conventional paper, C1S cover, or board stocks. Please note that Plasti-Pro has not been formulated for laser compatibility, and stay-open is limited. Please note that, as with any niche product, post-processing suitability, such as foil stamping, lamination, or UV coating, should be pre-tested.

<u>Ink Number</u>	<u>Description</u>	<u>Tack</u>
A102550	Black	14.5
A102551	Cyan	14.0
A102552	Magenta	13.0
A102553	Yellow	11.5

All tack readings are at 1200 rpm, 1 min., 90°F – T.A. 101 Inkometer.
