

# **Gans** TECHNICAL #170 BULLETIN

## **S-700 SOYLITE OVERPRINT VARNISH (Wax type)**

**Tack:** 7.5 - 8.5  
**Stability:** 1.7 Units/Min.  
**Drying:** 1.5 - 2.5 Hours (B.K. Drying Time Recorder)

**S-700 SoyLite Overprint Varnish** has been specifically formulated for sheetfed in-line wet trap application. It can also be used for wet on dry overprinting.

S-700 possesses the following characteristics:

1. Excellent gloss over printed and unprinted areas.
2. Excellent rub resistance.
3. Fast/hard film conversion.
4. Good press stability.

S-700 SoyLite Overprint Varnish contains sufficient soy oil to qualify for the "Printed With Soy Ink" logo as sanctioned by the American Soybean Association.  
*Caution:* S-700 is not imprintable with either inks or varnishes.

For jobs requiring subsequent processing (e.g. foil stamping or imprinting) Gans S-1027 L-8500 Gloss Overprint Varnish (non-wax type) is recommended. For more information on this product, please see Technical Data Bulletin #137.
