GANS LITHOFOUNT 91Z

***ONE STEP FOUNTAIN SOLUTION
FOR USE ON WEB & SHEETFED PRESSES***

ITEM NUMBER S-1802

***THE DAMPENING ABILITY OF A 2-STEP FOUNTAIN
SOLUTION IN A ONE-STEP!***

Gans *LITHOFOUNT 91Z* is our strongest desensitizing “one-step” fountain solution. This product enhances razor sharp reverses, will print cleaner fine line screens, and sharper halftones.

***Gans LITHOFOUNT 91Z will help you print sharper, for
a longer period, without the hassles of a 2-step!***

Gans *LITHOFOUNT 91Z* contains added desensitizing ingredients unlike any other formulation available today. *LITHOFOUNT 91Z* is designed to work on all CTP printing plates, with a wide variety of printing inks, such as fluorescents, metallics and pastels, and with the widest latitude in the press operator’s window.

KEY BENEFITS

- **Compatible with all CTP printing plates.**
- **Surface tension between 34 – 38 dynes.**
- **Extra desensitizing agents for difficult inks, such as metallics.**
- **Reduced paper waste with faster roll ups.**
- **Added blanket lubrication for quicker sheet releases and fewer “hickeys”.**
- **Contains agents to resist blanket piling.**
- **Enhanced ink and water balance.**

DIRECTIONS FOR USE

The recommended dosage for Gans *LITHOFOUNT 91Z* is **6 oz. per gallon** (4.5%). Based on press condition and dampening system, and additional ounce may be required.

SPECIFIC CONDUCTIVITY/pH RANGES

At the recommended dosage the starting conductivity for this product is **2700 over water**. Gans *LITHOFOUNT 91Z* carries a conductivity of 450 mmhos per ounce over water.

The desired pH in diluted solution should be in the range of **4.3 – 4.5**
