## *GPC 100*

*Item Code S-1837*

**RULE 1171 COMPLIANT PLATE CLEANER**  
Available in Quarts and Gallon Presentations

As the South Coast Air Quality Management District has recently adopted the regulation restrictions against clean-up solvents, metering roller cleaners, and plate cleaners, this product was formulated with both performance and compliance in mind. Clean-up solvents, metering roller cleaners, and plate cleaners must all be 100 grams per liter or less to be environmentally compliant for 2008.

**GPC100** is an acidic based, emulsion plate cleaner that provides maximum ink cutting ability in addition to the removal of scratches without any harm or damage to the image area of the plate.

**GPC100** will also successfully remove and eliminate any scumming, tinting, toning, and plugging of tight screens by desensitizing and forcing the non image area of the plate to become water receptive. This product may be used as a chrome roller cleaner and desensitizer because of it's strong ability to remove unwanted oxidation.

***Be Compliant, Buy Compliant!***

### **ADVANTAGES**

- Strong ink cutting abilities
- Suitable for use on Analog and CTP Plates
- Effectively removes scratches and oxidation from the printing plate
- Conditions the plate surface, leaving the non image area water receptive
- Multi purpose plate cleaner
- Reduced V.O.C. levels for environmental compliance

### **DIRECTIONS FOR USE**

**To Remove Scratches, Scum or Oxidation:**

**Pour GPC100** onto a clean sponge or shop towel. Wipe over the total plate surface, paying particular attention to the affected area. Remove any residues from the plate with water and proceed to print.

**For long or short term plate storage, Asphaltum Storage Gum (S-1830) may be used.**
