GANS CHROME ROLLER CLEANER

***FOR CLEANING AND DESENSITIZING CHROME
DAMPENING ROLLERS***

ITEM NUMBER S-1851

All press chrome dampening rollers are susceptible to oxidation. This oxidation disrupts the transferability of water from chrome to rubber, ultimately affecting the finished printed product.

Gans ***CHROME ROLLER CLEANER*** will increase water receptivity on even the most problematic of chrome rollers, providing a more stable dampening condition, ultimately allowing the printing plate to run cleaner.

***Protect and condition the delicate surface of your
expensive chrome rollers with Gans CHROME
ROLLER CLEANER!***

KEY BENEFITS

- Long lasting protection from oxidation and corrosion!
- Excellent for *increasing* water receptivity on chrome dampening rollers.
- Non-damaging to chrome rollers.
- Contains added gum arabic and acids to eliminate existing oxidation.
- Will not alter desired fountain solution pH levels.

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING.

Apply to the sensitive area of the chrome dampening roller using a cotton wipe or damp sponge. Buff the affected area and proceed to print.
