Wet on Wet Dense Black Metal Decorating Inks

Gans Ink has developed a black ink specifically for use in situations where wet lacquer applied over wet black ink film has shown to be problematic. It can still be used in an off-line or wet-on-dry trap situation.

Wet on Wet Dense Black offers excellent dot reproduction jettnes,s and density when printing, in particular, on white enamel flat sheets or black flat sheets Very stable on the press with good fountain stay-open properties,Wet-on-Wet Dense Black is imprintable and bleed-resistant to most lacquer coatings.

Ink	Description	Tack
