

Gans Q/S 4-Color Process Inks

Gans Q/S 4-color process inks have been developed to meet the market-driven requirements for very quick turn-around times and on-demand production schedules. With the advent and utilization of customized vehicle technology, the exceptional set speeds of Gans' Q/S process inks make work-and-turn/tumble jobs easier.

The Q/S Process Inks exhibit these outstanding properties:

- ❖ Greatly reduced drying times.
- ❖ Very quick set speeds.
- ❖ Excellent K-C-M-Y trapping.
- ❖ Excellent ink-water balance and stability.
- ❖ Average stay open in the can of 2 1/2 days.
- ❖ A good glossy appearance.
- ❖ Very low misting and good press stability.
- ❖ The Q/S 4-color process series is finishing friendly* and dries to a good hard film.

**Gans always recommends pre-testing before submitting a production job to coating, laminating, foil stamping, embossing, laser imprinting, or any other post-printing process.*

Ink No.	Description	Tack
A124460	Black	12.5
A124461	Cyan	12.0
A124462	Magenta	11.0
A124463	Yellow	9.5

All tack readings are @ 1200 rpm, 1 min., 90°Fahrenheit – Thwing Albert 101 Inkometer.
