GANS SoCAL RAPID WASH

FAST DRYING, RULE 1171 COMPLIANT

BLANKET & ROLLER WASH

ITEM NUMBER S-1841

***Finally, a SCAQMD compliant press wash that
dries fast without leaving an oily residue!***

With the recent changes in V.O.C. regulations in mind, Gans *SoCal Rapid Wash* was designed for use as a quick, non-water miscible wash with an excellent evaporation rate. This product will not leave any oily residue on either the blankets or within the roller train, unlike most of today's compliant washes that are known to dry excessively slow.

***Be VOC COMPLIANT with a reliable press wash that
won't damage your press! No more ridiculously
long washups waiting for the oily film to dissipate!***

Throughout our intense laboratory testing, we have proven that Gans *SoCal Rapid Wash* will not swell rubber compounds such as blankets or rollers. This product does not contain any surfactants that might create stripping of the ink in the roller train or plate blinding.

BENEFITS

- Latest technology in quick drying, low V.O.C. washes.
- Does not contain chlorinated solvents.
- Reduced V.O.C. Ratings (3.7 lbs. Per gal.)
- Does not contain vegetable esthers.
- Will not shorten the printing plate runability.

DIRECTIONS FOR USE

As a Blanket wash:

Saturate the rag or cloth with Gans *SoCal Rapid Wash* and proceed to clean the blanket in a side to side motion. There is no need to follow up with a dry rag, as this product air dries very **RAPIDLY!**

As a Roller wash:

Apply Gans *SoCal Rapid Wash* to the roller train and allow the ink to dissolve. Engage the wash-up blade or device. Apply more, if necessary and follow up with a water rinse, if desired.

Note: This product is not SCAQMD Rule 1171 compliant for Volatile Organic Compounds in Los Angeles, Orange, Riverside, and San Bernardino Counties, CA.
